

## Walking day #68...Monday, October 8, 2012...into Broadus, MT

Posted on Oct 10, Posted by [Administrator](#) Category [The Walk Blog](#)

we managed 24.3 miles with 45,513 steps...findings for the day: 1 CD case with several discs...saw deer and antelope running from the hunters, heard several gun shots as it is hunting season here...it drizzled the better part of the day, just enough to be irritating and cold but not enough to stop walking...walked right to the motor home doorstep...saw lots of geese heading east and south, same as me, they appeared to be moving MUCH faster than "the walker"!!!...cheers!!!
