

Walking day #79...Monday, October 29, 2012...Badlands through Buffalo Gap National Grassland

Posted on Oct 30, Posted by [Administrator](#) Category [The Walk Blog](#)

21.4 miles today (34.5161 km's) with 39,861 steps...findings for the day: nothing!!!...wildlife sightings: deer and antelope grazing and NOT playing, all kinds of prairie dogs (ok saw a few but HEARD the chirping of MANY) and two hawks of a species unknown to me...nice day for walking, cool (high 50's low 60's) muted sunshine, flat terrain and a gentle breeze...back to short sleeved shirt and shorts instead of long-johns and a half dozen shirts and gloves...again a hearty thanks to Jim for showing up at the right and perfect time...tomorrow we will be moving the motor home to Interior, South Dakota...cheers!!!
